SV 530/S-C

Corner Cleaning Machine

Our know-how is your advantage

SV 530/S-C Corner cleaning machine
with inner corner cleaning and freely programmable
CNC axis control for vinyl window profiles.

- Transom/bar machining.
- Cross machining (multiple also possible).
- 100 mm clamping height.
- PC control (serial standard with industrial PC) guarantees operator friendly usage of the corner cleaning machine as well as a perfect and uncomplicated integration in your production.
- Fully-automatic profile identification.
- Different tools can be turned on or off at choice.
- 10 freely selectable tool places (multiple equipment of up to 16 single tools is possible).

Standard tool equipment existing of:

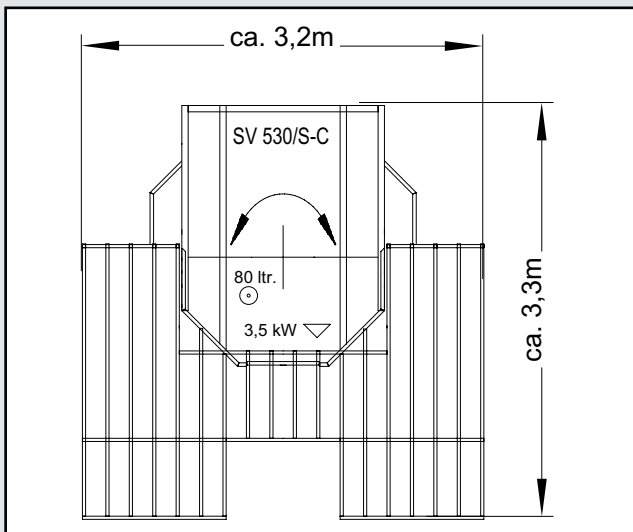

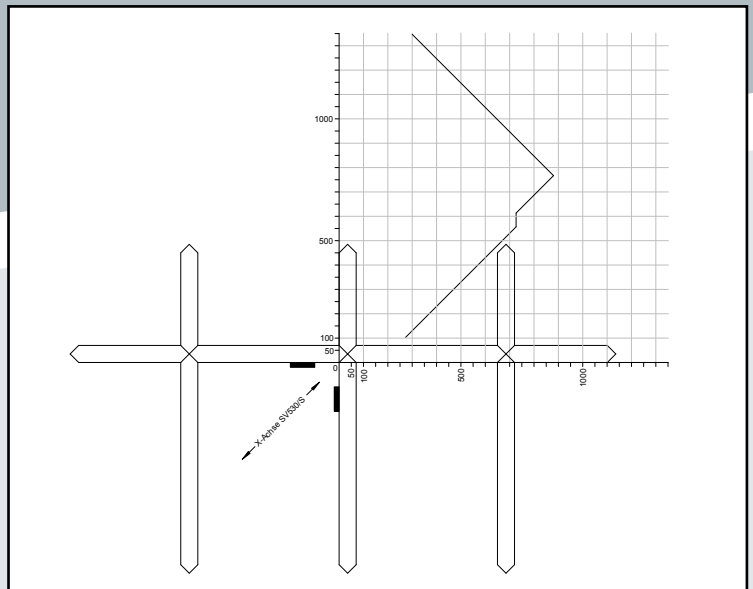

- 2 x grooving or cutting knife unit
- 2 x inner grooving knife unit
- 1 x disk cutter unit

Special tools upon request:

- cutter/drill unit vertical
- cutter/drill unit for radius machining
- inner grooving knife unit for inclined inner corners and bows
- outer cutting for sashes

Detailed information regarding additional options and special requests that can be materialized with this flexible machine will be provided by request.

Without safety guards!

	2050 kg		b max. = 140 mm h max. = 100 mm h min. = 30 mm
	230/400 V 3,5 kW		5000 1/min
	7 bar		80L
	A max. = ∞ B min. = 210 mm		B = 3170 mm T = 3270 mm H = 2280 mm

Technical data apply to basic machine without options
